HUANG HANQI

EDUCATION

08/2022-07/2026 Macau Polytechnic University
Bachelor of Science in Computing
- Current CGPA 3.67/4

08/2026-07/2027 University of Hong Kong
Master of Science in Computer Science (Financial Computing Stream)

RESEARCH

03/2025-08/2025 Optimization of Retrieval-augmented Generation Performance
- Probed into the module of retrieval-augmented generation in artificial intelligence based on ordinary system architectures.
- Added hypothetical documents, multiple answer generator, and different methods of data summarization to improve the system's performance in factual correctness, faithfulness, context recall, etc.
- The paper has been accepted for presentation at the 2025 6th International Conference on Computer Engineering and Intelligent Control and can be seen on IEEE.

INTERNSHIPS

03/06/2024-01/08/2025 Data Analyst & Back-end Engineer, Development Department, Foshan Dayan Data Technology Co. Ltd., Foshan, China
- Independently completed the design of the back-end architecture and code implementation for the order management module in developing an order preparation system for a glass factory, which reduced the order preparation time from 7 hours to 1 hour
- Helped build a retrieval-augmented generation model essential to developing an AI email response application using DeepSeek API and deployed the model on Dify, whose response accuracy reached 88%
- Kept in close contact with clients of the two projects to understand their demands and improve the project frameworks

03/06/2024-31/07/2024 Chief Project Engineer, Data Administration Division, Shunde District Government Service and Data Administration Bureau, Foshan, China
- Partook in the cybersecurity drill of the city, detecting and dealing with recurring vulnerabilities in government websites through supervisory control using Burp Suite, Kali Linux, and SQLmap
- Applied the above-mentioned tools in scanning government websites for any security flaws and wrote vulnerability assessment reports to urge prompt solutions

Internal

- Secured daily cyber protection of the bureau, including analyzing network flows and building honeypots using HFish and configuring IPtables on Linux to prevent illegal access

24/07/2023-19/08/2023 Back-End Engineer, Data Administration Division, Shunde Rural Commercial Bank, Foshan, China

- Assisted in developing the bank's internal personnel management system using Spring Cloud and MySQL
- Received training in project management and joined the weekly meeting to report project progress
- Participated in the testing and deployment of the system, including the logic of APIs in both client-side and server-side

COURSEWORK & EXTRACURRICULAR ACTIVITIY

03/2024-05/2024 Developing Tetris using Python (Coursework for Software Engineering)

- Established the basic logic and framework of the game, from block movement and rotation to row elimination and block stack-up, and set the degree of difficulty for level clearance
- Designed different game modes, including level challenges, the unlimited mode, and the countdown mode

01/2024-04/2024 Developing an Online Library Application Based on Django (Coursework for Internet Programming I)

- Realized basic functions of the application, such as borrowing and returning books, and searching books by the names of authors, books and ISBN
- Developed a recommendation system for users, where book commenting was enabled
- Graded full mark (4/4) for the course

09/2022-05/2023 Secretary, Event Planning Department, Mainland Students' Association at MPU

- Helped set up a stall for the Halloween event at the Ruins of Saint Paul's and plan a graduation night party
- Arranged for the association's monthly gathering, including the design of games and other activities
- Drafted and shared posts of the association to promote campus activities

OTHERS

Language Proficiency: Native in Cantonese and Mandarin, Fluent in English (IELTS overall 7)
Computer Literacy: Skilled in Java (Spring Boot), Python (Django, Flask, FastAPI, NumPy, Pandas), JavaScript (Vue.js), and Nginx
Hobbies: Sports (swimming, badminton, and jogging), Music (guitar and singing)
